## RECEIPT OF REFUNDABLE R&D TAX OFFSET

---

Triton Minerals Limited (**Triton** or the **Company**) is pleased to announce that it has received a refund of \$673,387 in relation to its qualifying expenditure for the year ended 31 December 2017 under the federal government R&D Tax Incentive program.

**Triton Managing Director Peter Canterbury said** "the R&D Tax Incentive program plays a vital role for emerging mining companies such as Triton. This incentive refund recognises the innovative work undertaken in Australia by the Company in flotation techniques for the processing of graphite ore to produce graphite suitable for the expandable and lithium ion battery markets.

This flotation testwork follows on from metallurgical testwork previously undertaken in independent laboratories in Europe and China that has confirmed that the high purity, large flake graphite from our flagship Ancuabe Project in Northern Mozambique is ideally suited to both markets"
